OBJECTIVE

Third-year B.Tech CSE student with hands-on experience building AI-powered full-stack applications - including a deployed LLM-based phishing detection tool, an LLM-driven order return-risk scorer, and an ongoing AI recruitment platform internship. Applying to Flipkart GRiD 8.0 (Software Development & AI Engineering tracks) to tackle real-world e-commerce challenges.

EDUCATION

B.Tech CSE, BVRIT Hyderabad college of engineering for women	Expected 2028
Intermediate (MPC), Narayana Junior College — 95.9%	2022 – 2024
Secondary School, Academic Heights Public School — 89.9%	2022

TECHNICAL SKILLS

Languages & Web: C/C++, Python, Java, JavaScript, Node.js, Express.js, HTML/CSS, REST APIs, SQL
AI / Gen AI: LLM Integration (Groq API), Prompt Engineering, Heuristic Scoring, Generative AI, Tableau
Tools & Platforms: Git, GitHub, VS Code, Render, Netlify, Postman

PROJECTS

Return-Risk Scorer — AI-Powered Order Return Risk Detection Razorpay AI Buildathon	2026
- Built a hybrid heuristic + Groq LLM scoring engine to flag e-commerce orders likely to be returned, with measured precision/recall on a held-out test set. - Combined score improved recall to 0.81 (F1 0.51) over heuristic-only baseline, tuned to favor catching missed returns; deployed full-stack app (Express API + frontend) as a single Render service.	
PhishLens — AI-Powered Phishing Email Detection	2025
- Full-stack detection tool (Node.js/Express) using a hybrid heuristic + Groq LLM scoring engine; deployed on Render & Netlify. github.com/kadavathpriyanka/PhishLens - Combines rule-based signals with AI-generated confidence scores for real-time threat reasoning.	
Zarmic — LLM-Based Smart Waste Management Platform Webathon Hackathon	2024
Web app using large language models to categorize waste and recommend optimal disposal/recycling routes; built and presented under hackathon constraints.	
Auto Suggest (BeingInfinity) — Trie-Based Autocomplete Search	2024
Implemented a Trie data structure for real-time autocomplete; integrated external API; custom dark-theme frontend with brass/amber accent system.	
RTRP — Smart Energy Monitoring Web App	2024
Appliance-level electricity tracking with slab-based bill calculation to help users visualize and reduce energy usage.	
Wise — Language & Currency Converter WISE Program	2024
Multi-feature web app for real-time language translation and live currency conversion via REST APIs.	

EXPERIENCE & HACKATHONS

AI Recruitment Copilot — Infosys Springboard Internship	2026
<i>8-week includes (resume parsing, candidate matching, skill-gap analysis, interview assistance, analytics dashboard)</i> Building an AI-driven candidate matching platform across 6 modules; completed resume parsing & profiling and candidate-job matching & skill-gap analysis milestones with role-based (Student/Recruiter/Admin) dashboards.	
Deloitte Virtual Internship — Technology Track	2024
<i>Gained exposure to enterprise software development workflows, problem-solving frameworks, and professional communication.</i>	
Hackathons	2024 – 2025
<i>DevAstra'25, Zignasa 2K24, Webathon — competitive problem-solving and rapid prototyping in national-level tech challenges</i>	

CERTIFICATIONS & ACHIEVEMENTS

Generative AI (LinkedIn) · Software Development (LinkedIn & Microsoft) · AI for Beginners (HP LIFE) · Python (Simplilearn)
AI Appreciate & AI Aware 2025 — Intel / Digital India · TCS iON Career Edge — Young Professional · IEEE Innovation Day
Volunteered at Nasscom Technology Confluence 2025 · Being Zero Coding League
