Hiring Manager

Goldman Sachs

Hyderabad, India

Re: Application for Technology Internship / Analyst Programme

Dear Hiring Manager,

I am writing to express my strong interest in technology opportunities at Goldman Sachs. As a B.Tech Computer Science Engineering student at BVRIT Hyderabad (expected graduation 2028), I bring a solid foundation in software development, a demonstrated passion for emerging technologies, and a proven track record of leadership and collaborative achievement.

My technical skill set spans C/C++, Python, Java, and HTML, complemented by hands-on project experience. I built a real-time energy monitoring web application with appliance-level tracking and slab-based electricity bill calculation, and co-developed Zarmic, a waste management platform powered by large language models, during the Webathon competition. These projects have sharpened my ability to translate complex requirements into practical, user-facing solutions — a capability I am eager to apply within Goldman Sachs's engineering teams.

Beyond technical work, I have actively pursued professional development through certifications in Generative AI (LinkedIn), Software Development (LinkedIn & Microsoft), and networking (JNCAA-Junos). I also completed the Deloitte Virtual Internship in Technology and was selected for the Aspire Leaders Program 2025, which reflects my commitment to continuous learning and leadership. Serving as NSS Coordinator, Technical Club Coordinator, and Campus Ambassador has further strengthened my communication, project management, and stakeholder engagement skills.

Goldman Sachs's reputation for rigorous problem-solving, innovation, and impact at scale aligns perfectly with my aspirations. I am particularly drawn to the firm's investment in engineering excellence and its culture of intellectual curiosity. I am confident that my technical abilities, leadership experience, and drive to learn would allow me to make a meaningful contribution from day one.

I would welcome the opportunity to discuss how my background and goals align with your team's needs. Thank you for your time and consideration.

Yours sincerely,

Kadavath Priyanka
